

food & beverage logistics

TRANSPORT IS OUR BUSINESS - A DIVISION OF THE A. HARTRODT GROUP

a. hartrodt italiana key player in the cool chain

At a. hartrodt italiana we are always sensitive to our customers' needs, providing tailor-made services to satisfy each individual logistic necessity.

Recent investments in our warehouse structures allow us to offer, effective December 15th 2020, new temperature controlled spaces, able to reach -35°Celsius, for the handling and the storage of specific food & beverage products, but also goods of different nature.

The new reefer cells enhance our service range in temperature controlled environments, in addition to the already available cool areas able to accommodate any product requiring storage between 0 and +20°C.

Our team remains available for any further information or quotation relating to the proposed services.
