

## India

India continues to be one of the fastest growing economies if the population continues to grow (currently 1.36 billion as of 2019) it will be probably be the most populous country by 2050. Growth will naturally slow as India becomes more economically developed, with the annual GDP growth expected to sink to 5.8 per cent in 2035."

This growth trajectory will see India become the world's third largest economy by 2030, overtaking the UK in 2025, Germany in 2027 and Japan in 2030. The GDP of India will rank third after the China and the USA.
